

Customized Safety Frosted Glass Acid Etched Glass Ultra Clear Anti Fog Mirror

Our Product Introduction

for more products please visit us on rise-glass.com

Basic Information

- Place of Origin: CHINA
- Brand Name: RISE
- Certification: CE, ISO, SGS
- Model Number: Frosting / Acid-Etched Glass
- Minimum Order Quantity: 1 container
- Price: USD1-99/
- Packaging Details: wooden case
- Delivery Time: 7 days
- Payment Terms: T/T, L/C, D/A, D/P, Western Union, MoneyGram
- Supply Ability: 500 Tons Per Day

Product Specification

- Size: Customized
- Film: Customized
- Delivery Time: 7 Days
- Payment: T/T
- Design: Customized
- Color: Transparent, Milky White, Bronze, Grey, Blue, Green, Etc.
- Highlight: 2mm etched tempered glass panels,
3mm etched tempered glass panels,
5mm etched toughened glass

Factory Customized Safety Frosted Glass/Acid-Etched Glass/Ultra Clear Anti-Fog Mirror

Basic Info.

Model NO.	Frosted /Acid-Etched Glass/Ultra clear anti-fog mirror	Product Description
Nominal Thickness	2mm	
Surface State	Floats Law Glass	Company
Grade	Excellent Grade	Profile
Forming	Float Process	we are well-known glass processing manufacturers producing different kinds of customized building glass, including tempered glass, laminated glass, insulated glass, decorative glass, etc. We offer one-stop services. Welcome to customizing your design!
Workmanship	Molding machinery	
Color	Clear	
Usage	Furniture, Door, Building, Window	
Delivery Time	15 Days	
Certificate	CE,ISO, SGS	
Payment	T/T	
Size	Customized	
Transport Package	Wooden Case	
Specification	6500*3300	
Trademark	Rise	Product Description
Origin	China	
HS Code	7005300000	
Production Capacity	20000 Square Meter/Day	
Color	upon to request	
Usage	Furniture, Door, Building, Window	
thickness	2mm,4mm,5mm,6mm,8mm,10mm,12mm,15mm,19mm	
size	upon to request	
HS Code	7005300000	
Brand	Rise	

Acid Etched glass is produced with the application of hydrofluoric acid on the glass. It creates a very smooth, glossy, and satin finish; Acid etched glass is maintenance-free as it does not show dirt marks or fingerprints. Acid etched glass also offers a wide variety of smoother options. Compared with sandblasting, etching glass with acid offers more finishes and various degrees of transparency.

Sandblasted glass panels are produced by firing a fine abrasive at the glass at high pressure, high-speed machine blasts down on the glass panel with sand, walnut husks or other materials. this permanent technique is then coated with a polymer easy clean coating to ensure that the glass remains as good as the day it was installed. Glass gradients can start and end at any percentage such as a 20%-80% gradient or a perfectly clear glass panel fade into a 100% full frost with zero opacity. Obscuring and privacy can be retained whilst maximizing light
