- Surface Treatment: Frosted, Acid Etched, Etc.
- Warranty: 10 Years
- Lamination: PVB, SGP, EVA, Etc.
- Max. Size: 2440mm*3660mm
- Notch: C, U, Etc.
- Min. Size: 300mm*300mm
- Highlight: **300mm tempered and laminated glass, Tempered Laminated Safety Glass 300mm, c notch Tempered Laminated Safety Glass**

Product Description

C Notch Safety Laminated Glass Suitable for Min. Size 300mm*300mm

Product Description:

Tempered Laminated Safety Glass is a type of safety glass that combines the strength of tempered glass and the safety of laminated glass. This type of glass is composed of two or more layers of glass bonded together with a layer of plastic interlayer, usually PVB, SGP, or EVA. It provides superior security against impacts, as well as excellent sound insulation and UV protection.

Tempered Laminated Safety Glass comes in a range of thicknesses from 2.28mm to 19mm, and is available in a variety of shapes and sizes, with a minimum size of 300mm*300mm. Notch options such as C and U are also available. This type of glass is also backed by a 10-year warranty, making it an ideal choice for any security application.

Tempered Laminated Safety Glass is an ideal solution for any application requiring a secure, safe, and durable glass. It is perfect for balcony doors, windows, storefronts, and any other location that requires a reliable and strong glass. By combining the strength of tempered glass and the safety of laminated glass, it is the perfect choice for any security application.

Our custom tempered laminated safety glass provides the highest level of safety and security. The double laminated glass is made of two pieces of glass and one layer of PVB, SGP, or EVA film between them, with the size, shape, notch, hole, and lamination customized according to your needs.

Features:

High Safety & Security
Custom Size, Shape, Notch, Hole, Lamination
Excellent Performance & Durability
Professional after-sales service

Support and Services:

Technical support and service for Tempered Laminated Safety Glass include:

Providing technical advice and troubleshooting assistance
Developing and implementing customized solutions based on customer needs
Maintaining and improving product quality and performance
Ensuring timely delivery of products and services
Offering repair and replacement services
Providing training and installation assistance

Packing and Shipping:

Packaging and Shipping for Tempered Laminated Safety Glass:

Tempered laminated safety glass is wrapped in protective paper and placed in a box of appropriate size that is filled with cushioning materials such as foam. The box is then sealed with a strong adhesive tape. The box is then placed inside a larger box that is filled with packing peanuts. Additional packaging materials may be used to secure the box in place and prevent it from shifting during shipping. The package is then labeled with the product's name, weight, destination, and any other relevant information. It is then shipped via a reputable delivery service.
