Product Description

Product Description:

Clear Tempered Laminated Glass is a kind of glass made of two or more layers of clear glass bonded together with one or more interlayers of polyvinyl butyral (PVB) between them. The glass is further tempered or heat-strengthened to increase its durability and strength. This type of glass is renowned for its high transparency, UV protection, hardness, fire resistance, and size – the maximum size being 3300mm*13000mm. It is a perfect choice for applications where safety, security, and safety are important. Laminated Clear Glass is an extremely durable and robust material, making it a great choice for high-traffic areas like hospitals, schools, and commercial buildings. With its superior transparency and UV protection, Tempered Laminated Glass is ideal for applications that require protection from the sun and other elements. Clear Tempered Laminated Glass provides a perfect balance of safety, security, and aesthetics, making it an ideal choice for modern building design and decoration.
