Product Description

Company

Profile

we are well-known glass processing manufacturers producing different kinds of customized building glass, including tempered glass, laminated glass, insulated glass, decorative glass, etc. We offer one-stop services. Welcome to customizing your design!

Product Description

Insulated glass: a glass product composed of two or more glass panes separated by a sealed air or gas-filled cavity. It offers superior thermal insulation, noise reduction, and condensation prevention. Commonly used in energy-efficient windows, doors, and facades, insulated glass enhances comfort, reduces energy consumption, and creates a quieter and more sustainable living or working environment.

Features

- 1.Energy saving:With heat insulation performance, the heat transfer coefficient is much lower than that of single glass.
- 2.Noise reduction: Excellent sound insulation performance, which can effectively reduce outdoor noise entering the room through windows.
- 3.With anti-condensation, reducing cold radiation and safety performance.
- 4.High wind pressure resistance.
- 5.The coated glass film layer located in the hollow cavity will not fall off.
