

## Heat Resistance Laminated Tempered Glass Offers Excellent Sound Insulation

Our Product Introduction

for more products please visit us on [rise-glass.com](http://rise-glass.com)

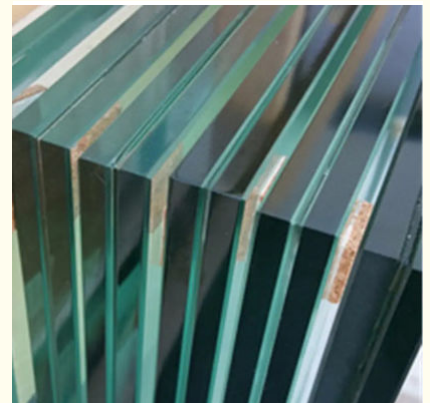

### Basic Information

- Place of Origin: China,qingdao
- Brand Name: Rise Glass
- Certification: CE CSI
- Model Number: L-01
- Minimum Order Quantity: 1 Crate
- Price: 6USD/SQM
- Packaging Details: Wooden Crates Worthy for Ocean and Land Carriage
- Delivery Time: 15 Days
- Payment Terms: payment By T/T at sight.
- Supply Ability: 8000SQM/DAY

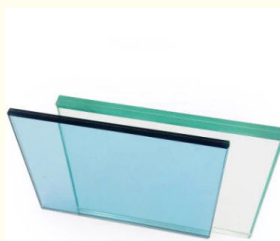

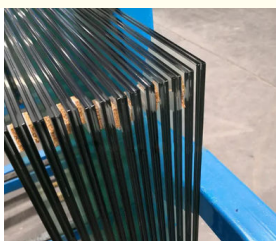

### Product Specification

- Sound Insulation: Excellent Sound Insulation
- Holes: Yes
- Glass Shape: Flat, Curved, Etc.
- Impact Resistance: High
- Heat Insulation: Good Heat Insulation
- Heat Resistance: High
- Lamination: PVB, SGP, EVA, Etc.
- Style: Tinted Glass Laminated
- Shape: Flat
- Structure: Solid
- Usage: Furniture, Building, Window
- Certificate: CE, ISO, SGS
- HS Code: 7007290000

## Product Description

### Product Description:

One of the main benefits of Tempered Laminated Glass is its high heat resistance. This makes it ideal for use in applications where the glass will be exposed to high temperatures, such as in fire-resistant doors or windows. Additionally, Tempered Laminated Glass has excellent sound insulation properties, making it perfect for use in buildings located near busy roads or airports where noise pollution can be a problem.

Another important attribute of Tempered Laminated Glass is its high impact resistance. The tempered glass is able to withstand a large amount of force without breaking, making it ideal for use in areas where there is a risk of impact or damage, such as in commercial or industrial buildings. Tempered Laminated Glass is also able to resist fire, making it an ideal choice for use in buildings where fire safety is a concern.

One of the key features of Tempered Laminated Glass is the ability to include holes in the glass. This is particularly useful in applications such as balustrades or railings where the glass needs to be secured to a frame or support structure. The holes are drilled into the glass prior to the lamination process, creating a strong and secure bond that is able to withstand significant force.

Overall, Tempered Laminated Glass is an excellent choice for a wide range of applications. Its high heat resistance, sound insulation properties, impact resistance, and fire resistance make it ideal for use in a variety of commercial and industrial settings. Additionally, the ability to include holes in the glass makes it a versatile product that can be used in a variety of different ways. If you are looking for a high-quality, durable glass product, then Tempered Laminated Glass is definitely worth considering.

### Features:

Product Name: Tempered Over Laminated Glass

Processed: Frosted / Acid-etched

Heat Resistance: High

Pvb Color: Clear, Grey, Red, White, Bronze

Notches: Yes

Heat Insulation: Good Heat Insulation

Tempered Overlay Laminated Glass, Thermally-Strengthened Laminated Glass, Thermally-Toughened Laminated Glass

### Technical Parameters:

Product Attribute	Value
Product Name	Thermally-Tempered Laminated Glass
Fire Resistance	High
Glass Shape	Flat, Curved, Etc.
Notches	Yes
Edge	Flat, C-pencil, Beveled, Etc.
Surface Hardness	High
Heat Insulation	Good Heat Insulation
Impact Resistance	High
Heat Resistance	High
Surface Quality	Smooth, Clear, No Bubble, No Scratch, Etc.
Layers	Multi Layers Upon Your Request

### Applications:

Rise Glass L-01 is a high-quality tempered over laminated glass product that is produced in China, Qingdao. This product is certified by CE CSI and has a minimum order quantity of 1 crate. The price for this product is 6USD/SQM and it is packaged in wooden crates that are worthy for ocean and land carriage. The delivery time for this product is 15 days and the payment terms are payment by T/T at sight. This product has a supply ability of 8000SQM/DAY.

The Rise Glass L-01 is a security laminated glass that is made by combining two or more glass panes with a thermoplastic interlayer.

This interlayer is processed under heat and pressure to create a strong bond between the glass panes. This process makes the laminated glass more resistant to breakage and increases its surface hardness. The Rise Glass L-01 has high heat resistance and excellent sound insulation properties. This product is also fire-resistant, making it a safe choice for buildings.

The Rise Glass L-01 is a tinted glass laminated product that is suitable for many different applications. It can be used in windows and doors for both residential and commercial buildings. Its security features make it a great choice for high-security areas such as banks,

airports, and government buildings. The thermally-processed laminated glass also makes it a great choice for areas with high temperatures, such as kitchens and bathrooms. The excellent sound insulation properties of this product make it a great choice for buildings in noisy areas.

In conclusion, the Rise Glass L-01 is a high-quality product that offers excellent security and safety features. Its thermally-processed laminated glass makes it suitable for use in many different applications, from residential to commercial buildings. Its high heat resistance, excellent sound insulation, and fire-resistant properties make it a great choice for buildings of all types.

### **Packing and Shipping:**

**Product Packaging:**

The tempered over laminated glass will be securely packed in wooden crates to prevent any damage during transport.

The crate will be marked with the product name, quantity, dimensions, and any other relevant information.

Each crate will also have a packing list enclosed.

**Shipping:**

The tempered over laminated glass will be shipped via a reputable and reliable carrier.

Shipping fees will be calculated based on the weight, dimensions, and destination of the shipment.

Customers will be provided with a tracking number to monitor the progress of their shipment.

Please note that shipping times may vary depending on the destination and any unforeseen circumstances.
