

Multi Layer Flat or Curved Tempered Laminated Glass

Our Product Introduction

for more products please visit us on rise-glass.com

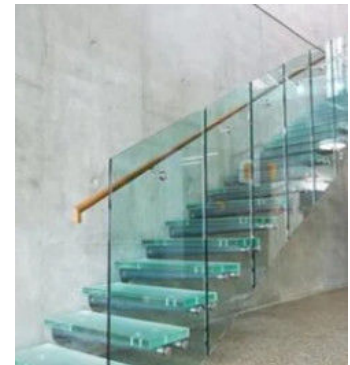

Basic Information

- Place of Origin: China,qingdao
- Brand Name: Rise Glass
- Certification: CE CSI
- Model Number: L-01
- Minimum Order Quantity: 1 Crate
- Price: 6USD/SQM
- Packaging Details: Wooden Crates Worthy for Ocean and Land Carriage
- Delivery Time: 15 Days
- Payment Terms: payment By T/T at sight.
- Supply Ability: 8000SQM/DAY

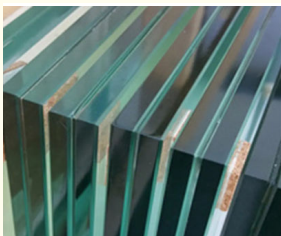

Product Specification

- Fire Resistance: High
- Sound Insulation: Excellent Sound Insulation
- Glass Shape: Flat, Curved, Etc.
- Heat Insulation: Good Heat Insulation
- Pvb Color: Clear, Grey, Red, White, Bronze
- Layers: Multi Layers Upon Your Request
- Surface Quality: Smooth, Clear, No Bubble, No Scratch, Etc.
- Holes: Yes
- Shape: Flat
- Structure: Solid
- Usage: Furniture, Building, Window
- Usage: Furniture, Building, Window

Product Description

Product Description:

One of the key benefits of Tempered Laminated Glass is its high level of fire resistance. The glass is designed to withstand high temperatures and prevent the spread of flames, making it an ideal choice for use in buildings and structures where fire safety is a top priority.

Another major advantage of Tempered Laminated Glass is its high impact resistance. The multiple layers of glass and interlayer material work together to absorb and distribute impact energy, reducing the likelihood of the glass breaking or shattering. This makes it a popular choice for use in areas where safety and security are paramount, such as in schools, hospitals, and government buildings.

In addition to its safety and security benefits, Tempered Laminated Glass is also highly valued for its surface quality. The glass is manufactured to be smooth, clear, and free from bubbles and scratches, ensuring that it provides a clear and unobstructed view while also maintaining a high level of durability and resistance to wear and tear.

Finally, Tempered Laminated Glass is available in a range of different layers, with the specific layers used depending on the requirements of the project and the preferences of the customer. Options include multi-layers upon request, giving customers the flexibility to select the right combination of materials to meet their specific needs and requirements.

Features:

Product Name: Tempered Over Laminated Glass

Processed: Frosted / Acid-etched

Surface Hardness: High

Notches: Yes

Glass Shape: Flat, Curved, Etc.

Lamination: PVB, SGP, EVA, Etc.

Security Laminated Glass: Yes

Thermally-Strengthened Laminated Glass: Yes

Thermally-Toughened Laminated Glass: Yes

Technical Parameters:

Technical Parameter	Description
Product Name	Tempered Over Laminated Glass
Fire Resistance	High
Style	Tinted Glass Laminated
Glass Shape	Flat, Curved, Etc.
Layers	Multi Layers Upon Your Request
Edge	Flat, C-pencil, Beveled, Etc.
Surface Quality	Smooth, Clear, No Bubble, No Scratch, Etc.
Heat Insulation	Good Heat Insulation
Heat Resistance	High
Processed	Frosted / Acid-etched
Sound Insulation	Excellent Sound Insulation

Applications:

Rise Glass L-01 Tempered Over Laminated Glass is ideal for various product application occasions and scenarios due to its high-quality attributes. This product is perfect for security overlay laminated glass, security laminated glass, and safety laminated glass.

Rise Glass L-01 Tempered Over Laminated Glass is processed with frosted/acid-etched technology, making it perfect for scenarios where privacy is essential. The product comes in different PVB colors, including clear, grey, red, white, and bronze, making it ideal for different interior design styles.

Rise Glass L-01 Tempered Over Laminated Glass is also fire-resistant, making it suitable for various scenarios where fire safety is essential. This product comes with holes and notches, making it easy to install and use.

In conclusion, Rise Glass L-01 Tempered Over Laminated Glass is an ideal glass product for various application occasions and scenarios. With its high-quality attributes, it is perfect for security overlay laminated glass, security laminated glass, and safety laminated glass. The product is processed with frosted/acid-etched technology, comes in different PVB colors, and is fire-resistant.

Packing and Shipping:

Product Packaging:
The tempered over laminated glass product will be packed in a sturdy cardboard box.
The product will be wrapped securely with bubble wrap or foam to protect it from any damages during transportation.
The box will be labeled with the product name and specifications for easy identification.

Shipping:
The product will be shipped through a reliable courier service.
The shipping cost will be calculated based on the weight and destination of the product.
The customer will receive a tracking number for their order to track the shipment status.
The product will be delivered within the estimated time frame, depending on the shipping destination.
