

Tempered Over Laminated Glass Ideal Solution For Commercial And Residential

Our Product Introduction

Basic Information

- Place of Origin: China,qingdao
- Brand Name: Rise Glass
- Certification: CE CSI
- Model Number: L-01
- Minimum Order Quantity: 1 Crate
- Price: 6USD/SQM
- Packaging Details: Wooden Crates Worthy for Ocean and Land Carriage
- Delivery Time: 15 Days
- Payment Terms: payment By T/T at sight.
- Supply Ability: 8000SQM/DAY

Product Specification

- Pvb Color: Clear, Grey, Red, White, Bronze
- Sound Insulation: Excellent Sound Insulation
- Impact Resistance: High
- Notches: Yes
- Glass Shape: Flat, Curved, Etc.
- Heat Resistance: High
- Surface Quality: Smooth, Clear, No Bubble, No Scratch, Etc.
- Edge: Flat, C-pencil, Beveled, Etc.
- Highlight: **Ideal Tempered Over Laminated Glass,
Residential Tempered Over Laminated Glass,
Commercial Tempered Over Laminated Glass**

Product Description

Product Description:

One of the key features of Tempered Over Laminated Glass is its ability to withstand high temperatures and fire. The glass is designed to have a high fire resistance, making it an excellent choice for buildings that require extra protection against fire hazards.

Tempered Over Laminated Glass is available in a range of PVB colors including clear, grey, red, white, and bronze. This allows the glass to be customized to match the design of the building and provide a cohesive aesthetic. Additionally, the glass can be processed to have a frosted or acid-etched finish for added privacy and style.

Another important attribute of Tempered Over Laminated Glass is its good heat insulation. The glass is designed to provide a protective barrier against heat transfer, keeping the interior of the building warm in the winter and cool in the summer.

Overall, Tempered Over Laminated Glass is an excellent choice for buildings that require extra security and protection. Its multi-layered design and PVB interlayer make it a safety laminated glass that is highly resistant to impact and shattering. The glass's ability to withstand high temperatures and fire make it a great choice for buildings that require extra fire protection. With customization options such as PVB color and processed finishes, Tempered Over Laminated Glass can be tailored to match the design of any building.

Features:

1) Extremely high safety: Since the two sheets of laminated glass are heated by the PVB glue as the interlayer, the two pieces of glass are firmly adhered to meet the requirements of the safety glass. After the glass is broken, the PVB film in the laminated glass will firmly stick the broken glass piece to the PVB. On the top, the glass will not fall, of course, it will not hurt people. The most important thing is that the impactor will not penetrate the glass.

2) Energy-saving building materials: The film can effectively reduce the solar light transmittance. And glass lamination using dark color low transmittance film has better performance at energy-saving than regular film of the same thickness. At present, China laminated glass manufacturers can produce product with a variety of colors.

3) Create aesthetic sense to buildings: Laminated glass with a tinted interlayer will beautify the buildings and harmonize their appearances with surrounding views which meet the demand of architects.

4) Sound control: PVB interlayer is an effective absorber of sound. The film has a damping effect on the sound waves, it can effectively inhibit the spread of noise, especially for buildings near airports, railway stations, downtown and side of roads, after the installation, the sound insulation effect is very obvious.

5) Ultraviolet screening: The interlayer filters out ultraviolet rays and prevents the furniture and curtains from fading effect.

Applications:

Laminated Glass is widely used in areas where a safety glass is needed.

Laminated glass is mainly used for windshields and bulletproof glass for automobiles and airplanes, as well as for building windows and doors with special safety requirements, partition walls, skylights for industrial plants, and some underwater projects. Therefore, such safety glass should be used in the lobby glass, awning, skylight, and atrium ceiling.

Customization:

Our minimum order quantity is 1 crate, and the price is 6USD/SQM. The product is packaged in wooden crates suitable for ocean and land carriage, and the delivery time is 15 days. We accept payment by T/T at sight, and our supply ability is 8000SQM/DAY. Our tempered laminated glass can also be customized with holes and is perfect for security laminated glass applications.
