Our Product Introduction

for more products please visit us on rise-glass.com

Product Description:

Tempered glass is the glass after heat treatment process, through high temperature and quenched glass internal molecular structure changes greatly, which is characterized by the formation of a uniform and strong compressive stress on the surface of the glass, the formation of a uniform and strong tensile stress inside, so that the mechanical strength and heat resistance impact strength of the glass is improved, and has a special fragmentation state.

1)material: 3~19mm float glass or patterned glass

2)Usage: Coffee and dining tables, cabinets, displays. CDshelves, TV tables and bathroom shelf, ect.

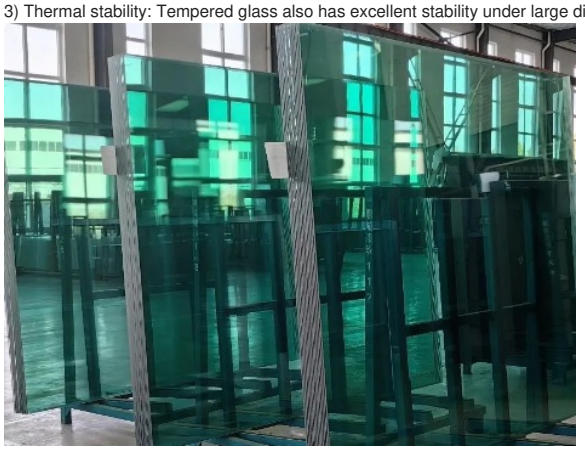
3)Edge: Highly-polished/ground edges, beveled, OG edges.

4)Shape: Squre, rectangle, round, half moon triangle.

5)Treatment: Can be tempered, curved, screen-printed, sandblasted, drilled, ect

Tempered glass features:

1) Intensity: Its performance of anti-impact, anti-bending and anti-temperature, all around 3-5 times than ordinary glass (annealed glass).
2) Safety: Tempered glass is hard to break, even broken, it will become lots of mini pieces, will not cause bad hurt to people.
3) Thermal stability: Tempered glass also has excellent stability under large difference in temperature (within 300centigrade)



Applications:

Glass is everywhere in our daily life, such as furniture, display cabinets, picture frames, facades, partitions, railings, doors, windows, stairs, roof, skylights, etc. And these glass products have a wide range of applications in residential buildings, office buildings, landmarks, banks, schools, aquariums, sports facilities, etc.
