## Product Description

### Product Description:

Toughened glass is made by heating flat glass to just below its softening temperature (650 °c) and suddenly chilling it with jets of cold air. It results in the outer skins under powerful compressive stress and the interior with severe tensile stress. In consequence, the impact applied to the glass will be overcome by the compressive stress on the surfaces to assure safety of use.

**Usage:** Window glass; Door glass; Curtain wall glass; Fencing glass in buildings, hotels, etc.

**Thickness :**3mm,4mm,5mm,6mm,8mm,10mm,12mm,15mm,19mm

**Colour:**Clear,F-green, Bronze,Grey,Ultra-clear

### Features:

1. 5 times harder than ordinary float glass, stronger resistance to thermal breakage than annealed or heat strengthened glass.
2. Once breakage occurs, the glass disintegrates into small cubical fragments, which are relatively harmless to human body.
3. It withstands abrupt temperature change of 220 Centigrade.
4. Sizes are produced as per customer request.

### Packing and Shipping:

Product Packaging:

The Frosted Tempered Glass product will be carefully packed in a sturdy cardboard box to ensure safe shipping.

The product will be wrapped in bubble wrap to prevent any damage during transport.

A safety label will be placed on the package to indicate the fragile nature of the contents.

Shipping:

Shipping is available to all regions within the United States.

The product will be shipped within 1-2 business days after the order is placed.

Delivery time may vary depending on the destination, but on average it takes 3-5 business days for the product to arrive.

A tracking number will be provided once the product is shipped, so you can track your package until it arrives.

## After Sales Service:

Customer satisfaction is considered very important for us. RISE GLASS are committed to provide quality products and services to our valuable clients. Satisfying the customers is one of the basic objectives of our group, RISE GLASS after-sale value-line includes timely delivery, offloading and installation guide, warranty service and customer training, real-time online support etc.

Breakage and complaints:

Glass shipping has always been a challenge, if any of your goods are lost, damaged during the transportation, please follow the below procedure.

1. Clear photo showing inside the fully -loaded container with the door open.
2. Please forward to our sales team directly, also, please contact local insurance agencies to inspect the offloading procedures.
3. Clear photos showing the defect or breakage along with batch number of the items which are labeled, Blurry photo will be rejected and you may be asked to take photos again.
4. In addition to the above, you have to take wide view photos and videos showing all damaged items in 1 pose from a different view
5. photo of container No and seal No, Ensure the entire number is readable in the photo.
