Customized Frosted Heat Treated Glass For End Applications

Our Product Introduction

Basic Information

- Place of Origin: CHINA
- Brand Name: RISE
- Certification: CE,ISO, SGS
- Model Number: Deep processed glass
- Minimum Order Quantity: 1 container
- Price: USD1-99/
- Packaging Details: wooden case
- Delivery Time: 7 days
- Payment Terms: T/T, L/C, D/A, D/P, Western Union, MoneyGram
- Supply Ability: 500 Tons Per Day

Product Specification

- Product Name: Frosted Tempered Glass
- Shape: Square
- Material: Tempered Glass
- MOQ: 100 Pieces
- Application: Decoration
- Thickness: 4mm
- Transparency: Translucent
- Edge: Flat Edge
- Highlight: **Customized Frosted Heat Treated Glass**, **End Frosted Heat Treated Glass**, **Heat Treated frosted tempered glass**

Product Description

Product Description:

Toughened glass is treated to be far more resistant to breakage than simple annealed glass, and to break in a more predictable way when it does break, thus providing a major safety advantage in almost all of its applications. Toughened glass is made from annealed glass treated with a thermal tempering process. A sheet of annealed glass is heated to above its "annealing point" of 600 °C; its surfaces are then rapidly cooled while the inner portion of the glass remains hotter. The different cooling rates between the surface and the inside of the glass produce different physical properties, resulting in compressive stresses in the surface balanced by tensile stresses in the body of the glass. These counteracting stresses give toughened glass its increased mechanical resistance to breakage, and are also, when it does break, what cause it to produce regular, small, typically square fragments rather than long, dangerous shards that are far more likely to lead to injuries. Toughened glass also has increased resistance to breakage as a result of stresses caused by different temperatures within a pane.

Applications:

Building Curtain Wall
Windows, Doors
Exhibition Hall
Shower Room
Furniture

Packing and Shipping:

Glass packed in seaworthy wooden crates or plywood cases with paper interlayer between every two pieces of glass or powder sprayed onto its surface to ensure safety, prevent glass from sticking together in humid conditions, the former much safer but gradually be replaced by the latter since which is more friendly to environment.

FAQ:

Q: What kind of glass do you have?
A: Float glass, Sheet glass, Tinted glass, Reflective glass, Silver mirror, Aluminium mirror,Laminated glass,Tempered glass,Low-E glass,Acid etched glass, Solar glass,Louver glass, Online coated glass, Figured glass, Safety glass in different colors and sizes.

Q: How to get a quotation?
A: We need to get specific details, such as size, color, thickness, quantity, edge,etc.

Q: Can you do the production as customized?
A: Yes, we have a professional technique team, we could produce the glass depends on your requirements.

Q: What the your glass package ? Are they safe ?
A: Wooden Crates Worthy for Ocean and Land Carriage .The crates will be very strong and every loading worker has 30 years packed, loading and fixation crates with container experience. And we send the loading pictures for you after we loading .

Q: What is your payment term ?
A : Our payment term is 30% T/T in advance and balance against B/L copy.Within 20 days after deposit and original B/L.You can payment By T/T, L/C at sight.

Q: What is your minimum order quantity?
A: Our MOQ is one full 20 feet container.
Products of different sizes and specifications could be mixed in one container.

Q: Can you supply a free samples ?
A: Yes, if you want us to provide big size sample according to your requirements, you should pay the cost of production.

Thanks for your time. Any enquiry, please feel free to contact us.
